M.S.R.S. COLLEGE, SHIRVA

Satisfaction Survey Report 2023–24

The Student Satisfaction Survey for the academic year 2023–24 was conducted in the second week of March 2024. The questionnaire was designed for three categories of stakeholders, namely Students, Parents and Alumni, and included multiple-choice questions for each category. The questions covered various aspects of the college, including syllabus coverage and completion, library resources, infrastructure, staff performance, the quality of internal assessment, gender sensitivity on campus, contributions to community development, and other related issues.

Questionnaires were distributed among students of all classes, and they were asked to express their opinions freely and honestly. The completed questionnaires were collected and analysed to prepare the Satisfaction Survey Report 2023–24.

All stakeholders responded to the questions included in the Satisfaction Survey Questionnaire. An analysis of the responses received from the different stakeholder groups—students, parents and alumni—indicated a positive perception of the staff and the facilities provided by the college. Their opinions can be summarised as follows:

- The college and its staff play a significant role in shaping the future of students.
- Stakeholders appreciate the affordable fee structure and the quality of education provided by the college.
- Stakeholders express a high level of satisfaction with the scholarship facilities and the mid-day meal scheme.
- The college is appreciated for its fair and impartial methods of awarding internal assessment marks.
- Stakeholders are satisfied with the availability of library resources and materials.
- The college's Community Development Programmes are appreciated by stakeholders.
